

Which computer case?

Full Tower?

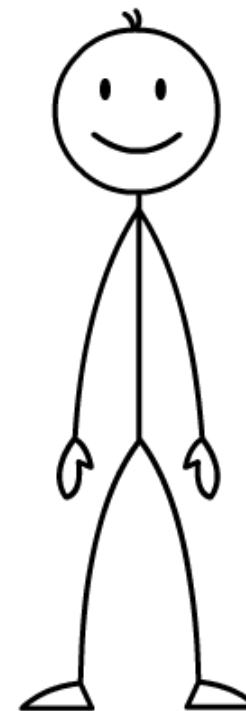

Mid Tower?

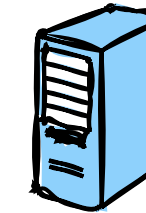

Mini ITX?

Micro ITX?

The CPU Case Market

Lower barrier to entry = More diverse

Newegg.com (there's a directors of case manufacturers):

Some big names with big ranges... but don't discount any brand, with good reviews!

The different case sizes

Different online shops categorize them differently, some by motherboard size, others by case type (as below)

Full Tower

~ 56cm (22") High
E-ATX Mobo
Power Users

Mid Tower

~ 46cm (18") High
ATX Mobo
Everyone

Mini Tower

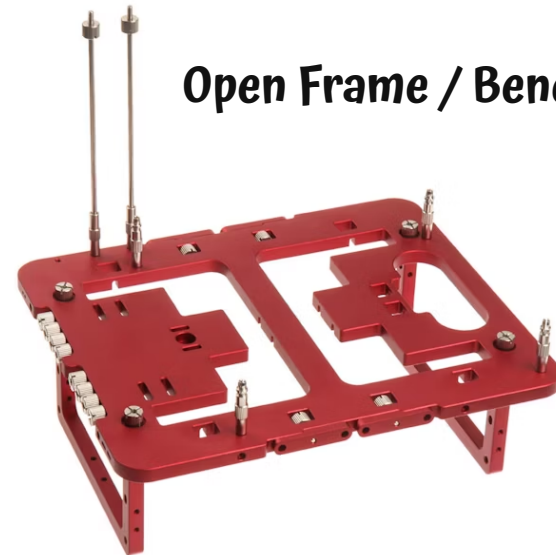

~ Size varies dependent on mobo
Mini ITX upto ATX
Gamers / WFH

Cube

~ 30-45cm (12-18") High
Mini / Micro ATX Mobos
Gamers

Open Frame / Benchtable

Size varies, Just a frame!
System testers/engineers

Super Tower

~ 70cm (27.5")
Dual System / Dual Mobo
Streamer

HTPC (Home Theatre PC)

~ Console sizes, Mini-ITX, Micro-ATX
Limited space, custom PSU, Home theatre

SFF (Small Form Factor)

Smallest sizes, Mini ITX
For custom jobs, Monitor mount

Notes on cases

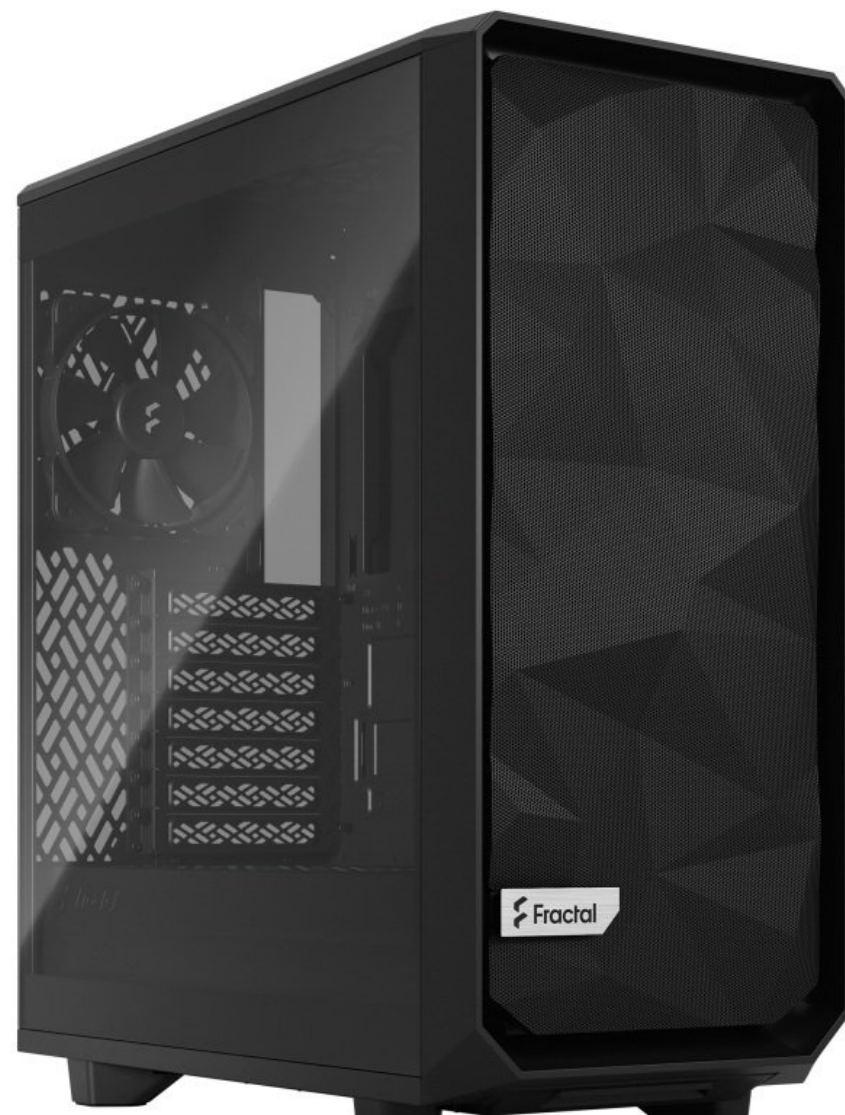

Will my GPU/PSU/Cooler fit?

Mid tower... unless it's a mammoth GPU, generally YES

Smaller towers you need to check dimensions

Mesh vs Solid

Mesh gives you better cooling but does little to help reduce noise

Front Panel Connectors

Normally standardized

- Power
- Reset
- Audio
- Mic
- USB
- Power/HDD Leds
- USB C (Newer)
- RGB (Light control from internal hub)

Quiet Cases

Solid sides

Fan grill muffling foam covers

Cooling will suffer

Cable Routing

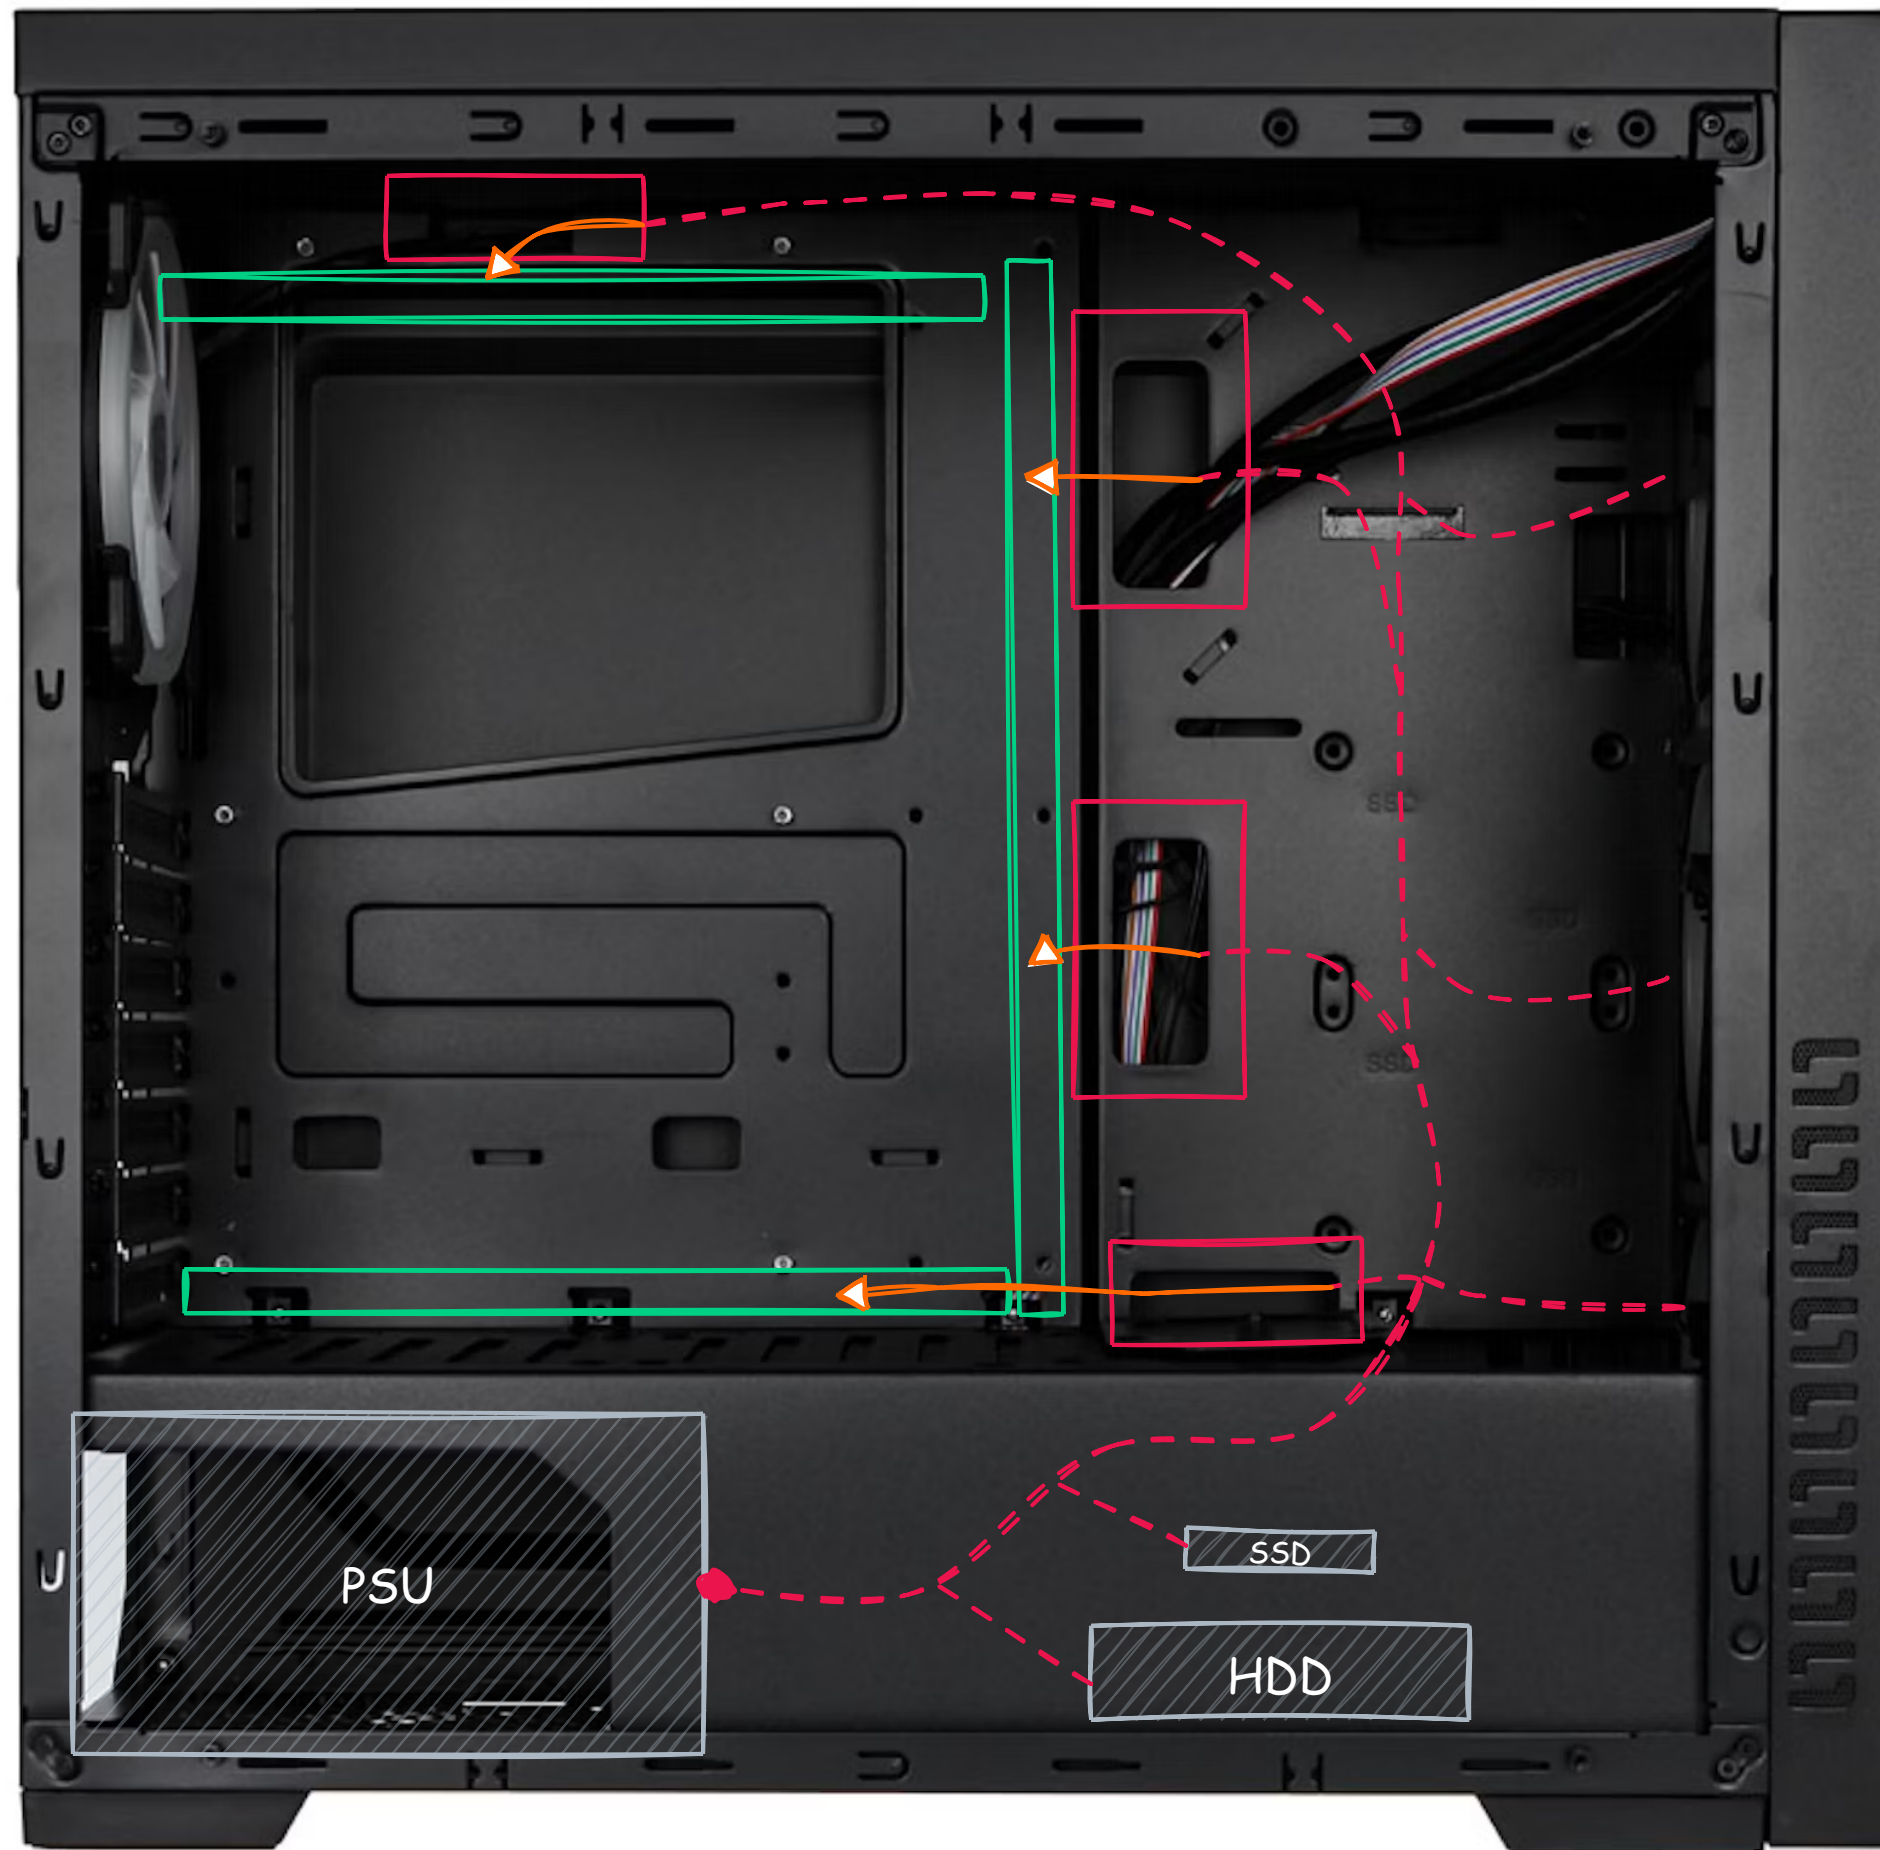

In a typical Mid-Tower gaming case

Cable Opening

Hidden Cable

Motherboard Headers

Visible Cable

Left Side View (The side you can see into if the case has a glass/mesh side)

Right Side View (Covered by a usually solid case side)

Case Recommendations

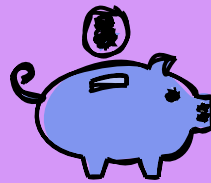

Budget/Casual

Mid Tower ATX

Most common, most compatible

Widest range of choice and bargains

WFH Pro

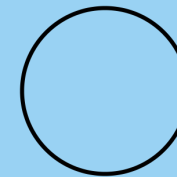

Anything to suit

Maybe a small form factor build

Mini tower?

Gamer

Mid or FULL tower

Consider a CUBE to showcase your GPU
