

Choosing a Cooling Solution

AIR

Silence is golden.....

Silence is less than 25 dB ish....

Quietest option

Cheapest option

Many reviews available

Ugly?

✓ Can get huge,

Check compatibility with small cases

AIO

Best cooling

Not necessarily quieter, pump whine is a thing

You STILL have fans

Much nicer to look at in the case

✓ Check radiator will fit your case

✓ Always check socket compatability

✓ Always check CPU compatability (Using TDP or Mfg Website)

Positive Case Pressure

More air driven in than out (more fans or faster running fans)

Case Fans

If your case doesn't come with them...

Different sizes, 40mm to 200mm

120mm is most common size

(check your case manual)

LED or non LED

PWM 4 pin or DC 3 pin (PWM is better)
